

Closure of Action Item #29

We need a method to add to the list of 20 monitored sources, and to inform the community as to which sources are on the list.

The Project will contact selected facilities to inform them of the year 1 data release policy, including

- list of ~20 monitored sources, with information on how to request small modifications
- serendipitous source release policy and methods of notification
- location of the MW campaigners information page
- opportunities for Guest Investigations

The list of proposed facilities to contact was presented on 17 November 2006, and the Project will proceed. The GUC will add to the list of facilities at any time.

Requests for updating the Monitored Source List are coordinated by the Project Scientists, vetted by the GUC, and negotiated with the LAT PI.
